THE PROBLEM

Advisers and investors decide without verified research

~49,000

announcements/month, Q2 FY27

Earnings, share pledges, and board notices hit NSE and BSE daily. Analysts, investment advisers, and portfolio managers still read scanned PDFs by hand.

Scattered

research, backtesting & advisory tools

Professionals and investors jump between exchange PDFs, ratio screeners, backtesters and spreadsheets, losing hours and context at every hop.

Unverified

answers from general-purpose AI

General chatbots sound confident but hallucinate Indian financial figures. Without a verified filings database underneath, their answers cannot be trusted.

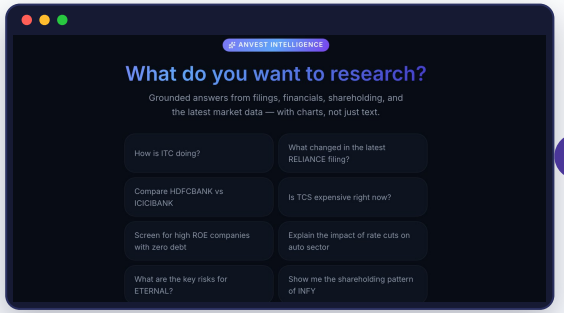

3,900 SEBI-registered firms and 13.4 crore investors don't lack information. They lack a trustworthy way to turn it into a decision.

Warehouse, announcement date: Jul 45,997 · Aug 61,875 · Sep 38,558 (2026) · Q2 FY27 average 48,810/month · extracted 20 Oct 2026

THE SOLUTION

From a question to a tested strategy, in one flow

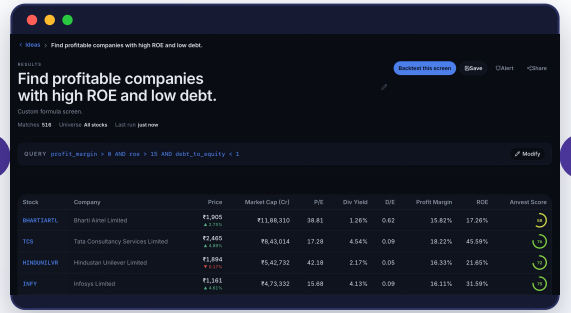

1 ASK

Ask in plain English

“Find profitable companies with high ROE and low debt.”

2 SCREEN

AI builds the screen

Plain English becomes transparent, editable filters across 6,000+ stocks, with a one-click backtest.

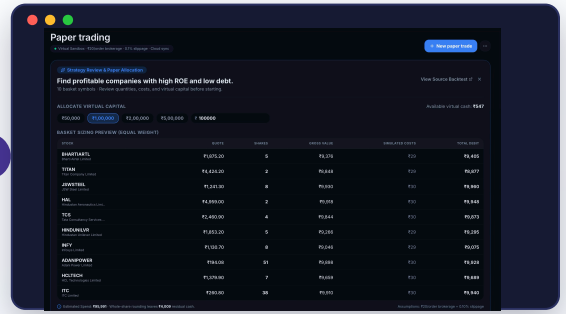

3 BACKTEST

Backtest it on history

Brokerage, security taxes (STT), stamp duty, and slippage built in; alpha, drawdown, and Sharpe shown.

4 PRACTISE

Practise, then act

Paper-trade the strategy with virtual cash and review every decision in a journal.

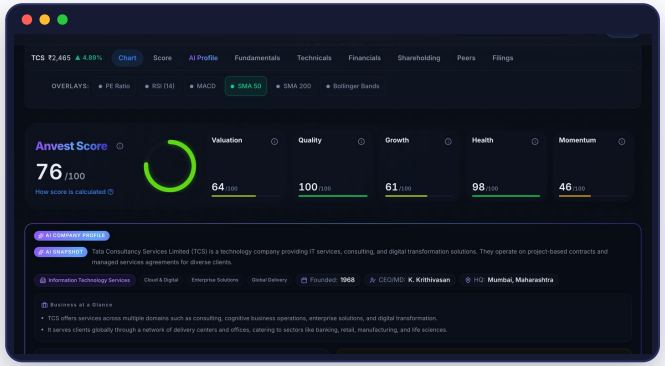

Verified live on 19 Oct 2026: this prompt generated a 516-stock screen (ROE > 15%, D/E < 1), a 1Y costed backtest and a 10-stock paper basket.

AI translates the question; deterministic code computes the numbers: every figure is exact and links to its source filing.

LIVE TODAY

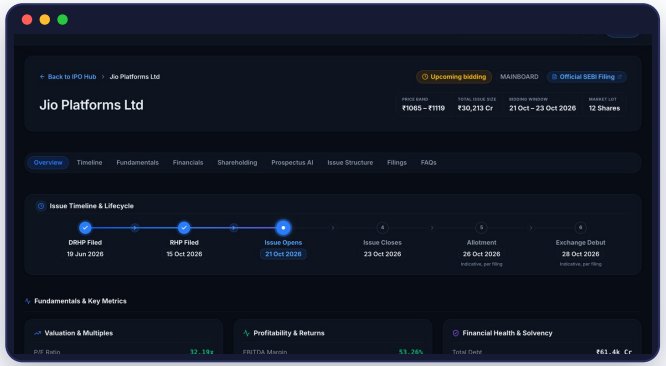

One verified filings database powering six live workflows

Every module reads from the same verified database—serving as free organic discovery that upgrades users into Individual (Plus/Pro) and Advisory Team (Desk) plans.

Stock intelligence

Anvest Score, AI profile, financials and filings

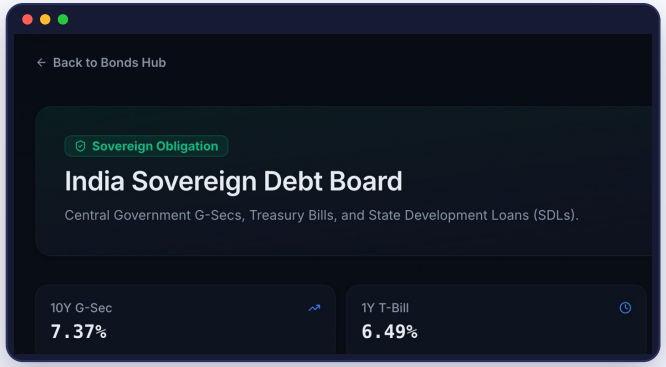

IPO hub

Jio Platforms: price band, size & dates from its IPO prospectus

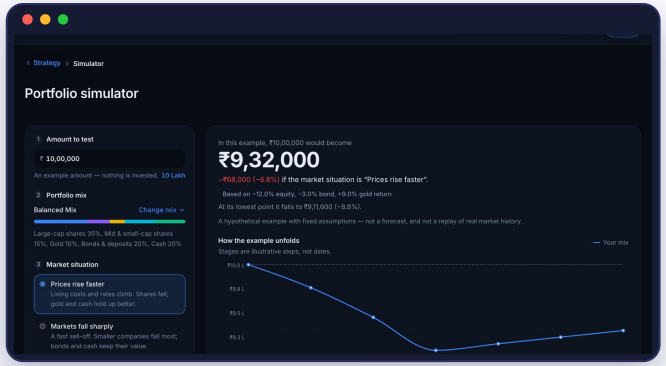

Mutual fund X-ray

991 schemes compared on returns, cost, risk and overlap

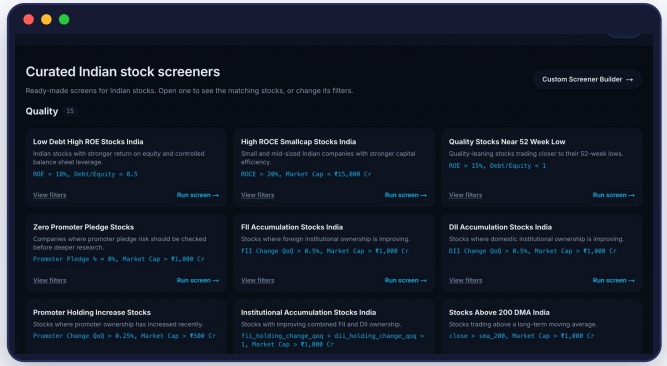

Bonds and fixed income

Government bonds (G-Secs), T-bill yields & 10-year benchmark

Market stress simulator

How a portfolio behaves in a sell-off or an inflation shock

Curated screens

Insider buying, institutional accumulation & quality filters

TRACTION

Built and live, with auditable source checks

SHIPPED AND LIVE

- Source-cited AI research copilot
- 6K+ stock pages; 6,119 AI profiles
- Paper trading and trade journal
- Mutual fund X-ray: cost and overlap
- Wealth, retirement and stress simulators
- Natural-language stock screener
- Backtesting with Indian taxes & fees
- IPO hub with prospectus analysis
- Bonds, G-Secs and yield tools

50 / 50 recent company filings: 100% of extracted revenue & profit matched NSE filings (20 Oct 2026)

418 AI research queries logged across 16 pilot and internal test accounts

238 historical strategy backtests run and saved across test accounts

12 months from first code commit to live 9-module platform, zero outside capital

Built-in trust & SEBI compliance: every answer passes a numerical source check before display, flags missing data instead of guessing, and gives zero buy/sell calls.

WHY NOW

Four shifts make this the moment

AI can finally read corporate filings

Language models can now parse complex disclosures—but financial trust requires a verified, passage-indexed filings database underneath, which Anvest has built.

SEBI's new rules favor transparent logic

SEBI's April 2026 rules require exchange approval and Research Analyst licensing for opaque "black-box" signals. Because Anvest uses transparent, verifiable rules, it operates live today while licensing is underway.

Brokers are connecting accounts to AI

Zerodha and peer brokers now let users link AI assistants directly to their brokerage accounts—creating urgent demand for a verified research engine that won't hallucinate numbers.

Rising retail & adviser scrutiny

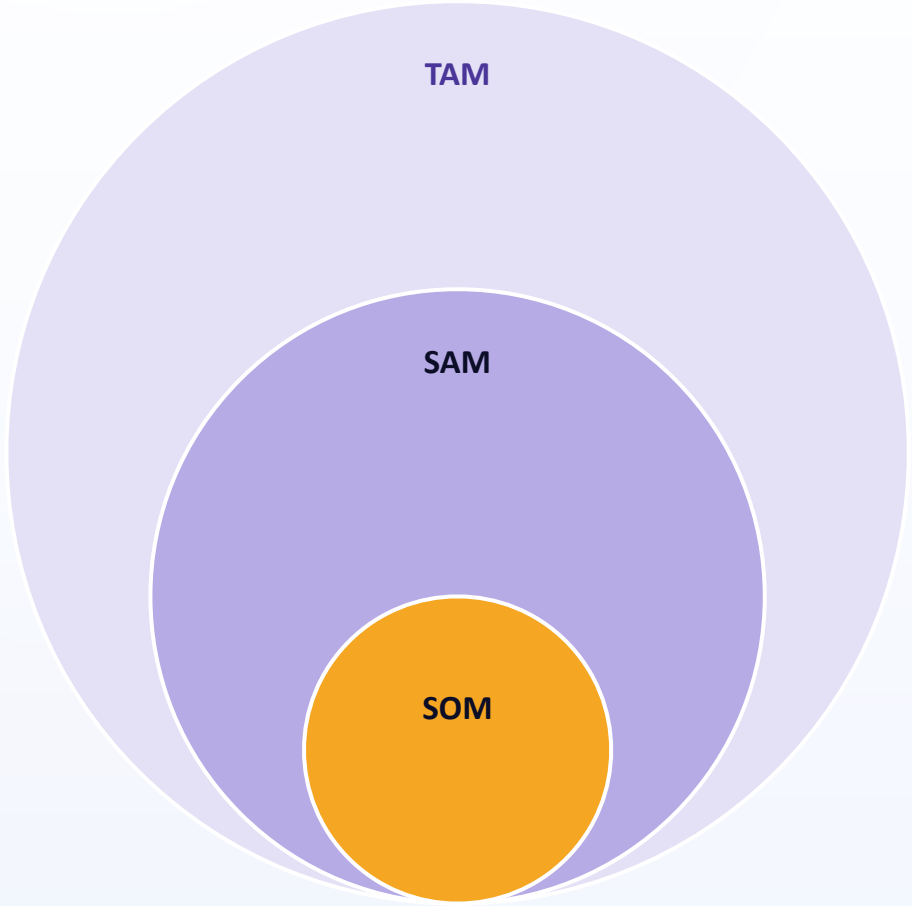

13.4 crore retail investors are on NSE, while 3,900 SEBI-registered firms face stricter rules requiring documented, source-cited research.

Proven willingness to pay for verified AI research: AlphaSense reached $600M+ ARR ($7.5B valuation, Jun 2026) selling filing-cited AI to global institutions. Anvest Desk brings this to Indian advisory teams at ₹2,999/seat/month (~$380/yr).

Sources: SEBI algo circulars (Feb & Sep 2025) · Zerodha Kite AI connector · NSE Market Pulse (Jul 2026) · FinTech Global (Jun 2026)

MARKET

A $1.3B market, starting with high-intent advisory teams

₹12,269 Cr · $1.3B / yr

Individual investors ₹10,985 Cr (4.6 Cr active NSE accounts at ₹2,388/yr) + financial professionals ₹1,284 Cr (3.55 lakh SEBI-registered firms & mutual fund distributors at ₹35,988/seat/yr)

₹2,371 Cr · $250M / yr

Active retail traders ₹2,292 Cr (~96 lakh active traders) + core advisory teams ₹78 Cr (3,900 SEBI-registered firms & 3,350 top fund distributors, averaging 3 seats per firm)

₹23 Cr · $2.4M ARR

Year-5 target across all four revenue streams (~1% of SAM), as advisory team plans expand to wealth practices, family offices, and chartered accountants.

Why start with advisory firms: a concentrated, high-intent market (₹78 Cr SAM) reachable via direct outbound by 2 B2B sales reps—generating revenue from Month 3 and proving institutional credibility before scaling to retail and broker APIs.

Annual pricing: Individual (Plus) ₹2,388/yr; Advisory Team (Desk) ₹35,988/seat/yr · Sources: NSE Market Pulse (Aug 2026) · SEBI FY25 study & directory (Oct 2026) · Cafemutual MF distributor data

COMPETITION

Others solve one step; Anvest connects the whole workflow

	Filing-Cited AI Answers	Plain-English Stock Screen	Backtest After Taxes & Fees	Virtual Paper Trading	Multi-Asset Portfolio Tools	Automated Broker Execution
Anvest	**Yes (passage-cited)**	**Yes (plain English)**	**Yes (Indian taxes & fees)**	**Yes (with journal)**	**Yes (stocks, MFs, bonds)**	Planned (post-SEBI license)
Screener.in	Partial: metered AI summaries	Partial: formula syntax only	—	—	—	—
Tijori	Partial: filing timeline only	**Yes: plain-English search**	—	—	Partial: equity & MF tracker	—
Trendlyne	Partial: earnings-call summaries	**Yes: AI stock screener**	Partial: lacks full tax/fee model	—	Partial: portfolio health report	Partial: pre-set stock baskets
Tickertape	—	Partial: manual filter sliders	—	—	Partial: mutual fund screener	—
StockGro (Stoxo)	Partial: unverified AI chat	—	Partial: basic strategy builder	—	—	—
Streak	—	Partial: price/volume scanners	**Yes: technical indicators only**	**Yes**	—	**Yes: technical orders via Zerodha**
General AI Chatbots	Partial: no verified Indian filings	—	—	—	—	—

Anvest connects the full workflow in one account: from a filing-verified AI answer to an editable stock screen, a tax-and-fee-adjusted backtest, a virtual paper portfolio, and multi-asset wealth planning.

Yes = core feature · Partial = limited or adjacent · — = not found on the vendor's public product pages, checked 19 Oct 2026

THE MOAT

Our moat is the self-healing filings pipeline beneath the AI

1. Ingest

Prices, PDF filings, exchange data (XBRL), fund NAVs & IPO prospectuses

15,899

cash-flow rows recovered from corrupted exchange feeds (XBRL)

2. Repair & OCR

Fixes corrupted or mislabeled exchange feeds; reads scanned PDF tables

3,608

conflicting source figures flagged across 1,022 companies

3. Cross-Verify

Accounting-identity checks, cross-source validation & sector rules

10 of 10

major bank earnings in Q1 FY27 filed as scanned PDFs needing OCR

4. Cite Source

Links every number to the exact filing passage—or flags missing data

2.94M

historical NSE & BSE corporate filings indexed in our database

5. Power All Tools

One verified database drives AI answers, screens, backtests & plans

1.35M

searchable filing passages refreshed daily with audit trails

Why competitors can't easily bolt this on: screeners built on summary feeds cannot cite exact filing passages. On Indian exchanges, machine-readable filings (XBRL) mislabel reporting periods, bury annual numbers inside Q4 footnotes, and upload bank results as scanned PDFs—taking 12 months of custom repair rules to solve.

Internal data-quality audits, Jul–Sep 2026

BUSINESS MODEL

B2B subscriptions fund the Seed stage; retail scales Series A

SEED STAGE FOCUS (95% OF MONTH-15 REVENUE)

1. Anvest Desk

₹2,999 / seat / mo · Advisory Teams

For SEBI-registered analysts, advisers, portfolio managers & distributors: client stock watchlists, daily filing digests, cited AI research, and shared workspaces. Paying from Month 3.

75% OF M15 ARR

2. Broker & Wealth API

Tiered: ₹15 → ₹10 → ₹6 / active user

Brokers, wealth apps, and AI assistants embed Anvest's verified filing answers and screeners via API. Paid pilots launch in weeks; first paying partner goes live in Month 10.

20% OF M15 ARR

SELF-SERVE & POST-SERIES A EXPANSION

3. Anvest Plus & Pro (Individuals)

5% OF M15 ARR

₹199–₹599 / month (Pro ₹4,999 / year) · Free tools drive discovery

Free calculators, IPO pages, and stock screens drive organic search traffic; active investors upgrade for 150–600 monthly AI queries, costed backtesting, paper trading, and portfolio X-ray.

4. Licensed Model Portfolios

POST-SERIES A

₹250 / mo net subscription + broker revenue share (from Month 22)

Ready-to-invest stock baskets and periodically rebalanced rules deployed via partner brokers—launched in Year 2 once SEBI Research Analyst and exchange approvals are complete.

Month-15 ARR run-rate of ₹87 L ($92K) on $500K raise: 75% Advisory Teams (Desk), 20% Broker APIs, 5% Individual Plans. Checkout goes live in Days 1–90.

GO-TO-MARKET

Win advisory firms via direct sales, then scale through broker APIs

1. Direct Outbound to Advisory Boutiques (Anvest Desk)

Founder-led sales to 3,900 SEBI-registered advisory and research firms (starting with fast-moving 1–5 seat teams) and 3,350 top mutual fund distributors.

2. Organic Search via 7,000+ Public Stock & Fund Pages

6,000+ stock pages, 991 fund pages, IPO hubs, and calculators answer specific filing queries on Google—converting free visitors into Plus, Pro, and Desk subscribers.

3. B2B2C Distribution via Broker & Wealth-App APIs

Plug-and-play APIs and AI connectors embed verified research inside retail brokerage apps—reaching thousands of investors with zero paid ad spend.

4. Shareable Research Links & Compliant Creator Referrals

Every cited answer, screen, and backtest generates a shareable public link; financial educators join on referral terms under SEBI-compliant informational rules.

90-DAY FUNNEL & 18-MONTH MILESTONES

200
SEBI-registered advisory firms approached

40
live product demos conducted

10
paid Desk team pilots closed

- M1–6: Checkout & 7K+ pages live; SEBI RA filed (~16 Desk teams)
- M7–12: 2nd sales rep (M9); 1st broker API (M10); ~54 Desk teams
- M13–18: ~99 Desk teams & 2nd API → ₹1.12 Cr ARR for Series A

WHERE THIS GOES

Retail investing is going algorithmic, and Anvest is the on-ramp

54%
of NSE cash-market trading volume is already algorithmic

67%
of NSE equity-derivatives volume is algorithmic (73% in stock futures)

1 Apr 2026
SEBI's retail algorithmic rules took effect across all Indian brokers

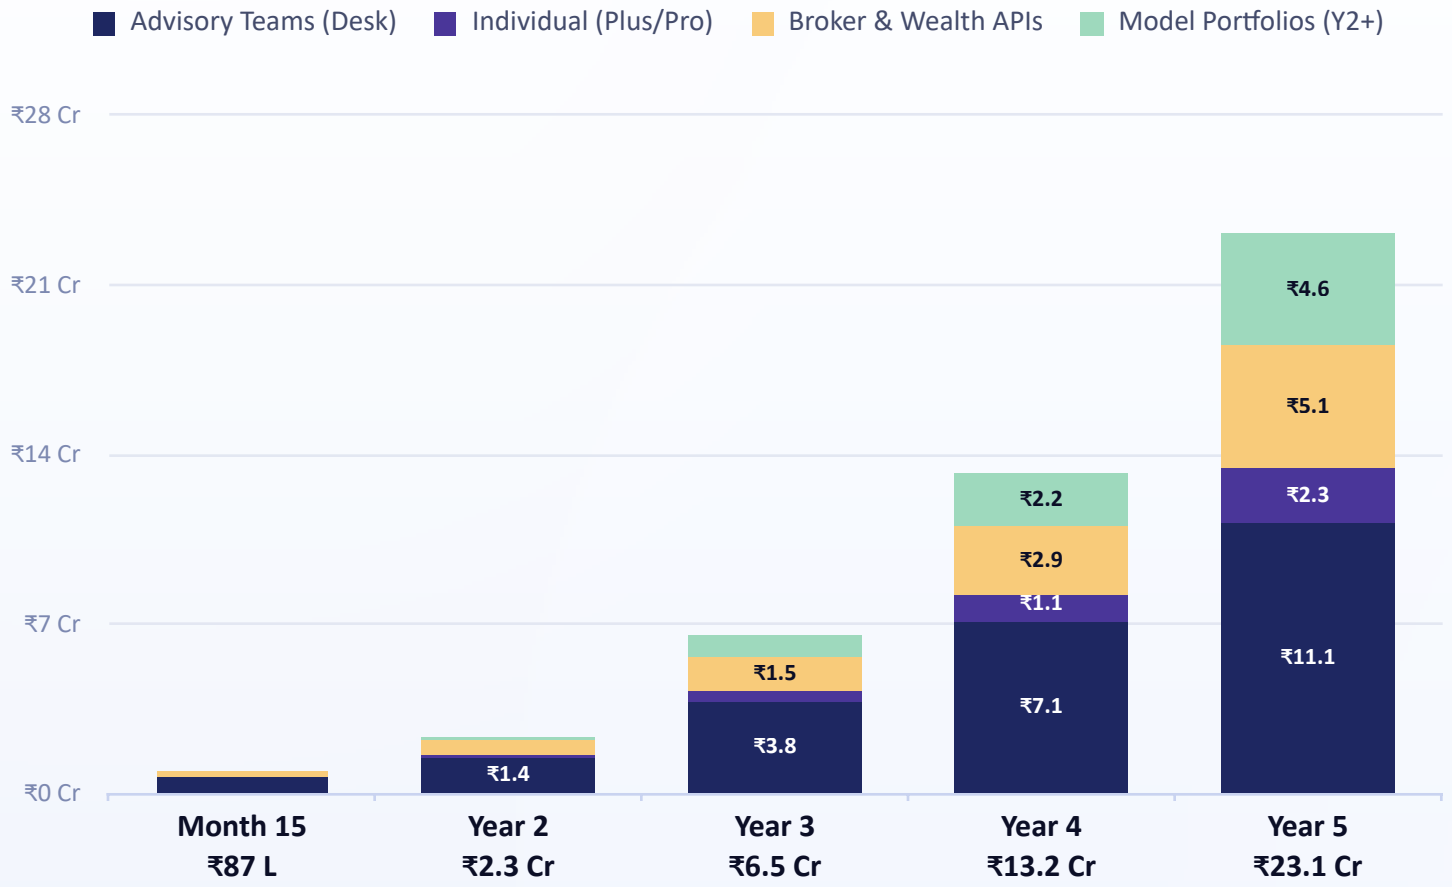

1. Idea	Ask an investing question or thesis in plain English	LIVE
2. Rules	Build transparent rules on fundamentals & technicals (P/E, ROE, RSI, SMA)	LIVE
3. Evidence	Backtest on history with Indian taxes/fees and periodic rebalancing	LIVE
4. Practice	Forward-test with virtual cash and a decision journal	LIVE
5. Deploy	Execute periodically rebalanced stock baskets via partner brokers (Post-SEBI License)	NEXT

Why pre-trade research is the open space: trade execution is already automated, and most exchange algo volume is intraday trading. Anvest owns the transparent, fundamental & filing-driven research layer for long-term portfolios that rebalance periodically—with a clear regulatory path to broker execution in Year 2.

NSE Market Pulse, Dec 2025 (turnover share, FY26 to Nov) · SEBI retail algo circulars, 4 Feb 2025 and 30 Sep 2025

FINANCIAL PLAN

Profitable on $500K alone, with a Series A path to ₹23 Cr ARR

Month-15 Net MRR ($500K): ₹5.5L Advisory Desk + ₹1.4L Broker APIs + ₹0.4L Individual Plans = ₹7.3L/mo (₹87L ARR), net of 18% GST (₹95 = $1).

SEED ROUND · MONTH-15 OUTCOMES

	$400K	$500K	$700K
ARR run-rate	**₹68 L**	**₹87 L**	**₹1.06 Cr**
Advisory firms	**55**	**77**	**88**
Broker APIs	**2**	**2**	**3**
Net burn / mo	**₹13.9 L**	**₹15.4 L**	**₹15.6 L**
Cash breakeven	**Mo 48***	**Mo 42**	**Mo 40**

**$400K provides 31 months runway; $500K and $700K reach breakeven with zero new funding.*

UNIT ECONOMICS & SERIES A DRIVERS

- Unit economics: ₹2,245 net/seat/mo; ₹0.73L team CAC (~11-mo payback)
- Gross margin scales from 46% at Month 15 to 83% at Year-5 scale
- Series A (M18): 15 sales reps, 10 broker APIs & licensed baskets → ₹23.1 Cr ARR

TEAM

A founder who has already built the hard part

Harsh Bhardwaj

Founder · full-time on Anvest from the close of this round

- B.Tech, Electronics and Communication, IIT Guwahati (2015–19)
- Senior Engineering Lead building production multi-agent AI systems
- Seven years building high-throughput backend and distributed systems at New Relic, Shiprocket, Weave and Jaguar Land Rover
- Solo-built Anvest's corrupted-filing repair pipeline, verification engine, and 9-module platform in 12 months with zero outside capital

FIRST HIRES FUNDED BY THIS ROUND

1. **B2B Growth & Partnerships Lead**
   Leads Anvest Desk sales to advisory firms and broker API deals
2. **Senior Data Engineer**
   Owns nightly exchange ingestion, OCR quality, and real-time feeds
3. **Full-Stack & Quantitative Engineer**
   Builds team workspaces, filing alerts, and broker execution links
4. **Second B2B Sales Rep (Month 9 on $500K)**
   Scales direct outbound to 4 new advisory teams per month

Backed by automated nightly health checks, runbooks & SEBI compliance advisers.

Production edge already built: automated fixes for mislabeled NSE filing periods, Q4-buried annual figures, and scanned bank PDFs.

THE ASK

Raising $500K to scale advisory team sales and broker API reach

$3.5M post-money valuation cap · Convertible Debentures / Preference Shares (CCD/CCPS) · First close $400K, hard cap $700K

$185K — 37%

Engineering & B2B Sales Team

B2B growth lead, data engineer, full-stack/quant engineer, plus 2nd B2B sales rep in Month 9

$65K — 13%

SEBI Licensing, Exchange Data & Cloud

SEBI Research Analyst license, licensed NSE/BSE feeds, and AI cloud serving

$100K — 20%

Go-to-Market & Operations

Advisory pilot onboarding, search rollout, acquisition tests, and founder salary

$150K — 30%

Cash Reserve & Runway Buffer

Maintains a ₹51 L+ cash cushion all the way to Month-42 cash-flow breakeven

MILESTONES DELIVERED BY MONTH 15 ON $500K

₹87 L
ARR run-rate (~$92K; ₹7.3L net MRR)

77 Firms
paying advisory teams (~243 seats)

2 APIs
paying broker / wealth-app partners

SEBI RA
Research Analyst license secured

Verified
published AI accuracy benchmark

Month 42
cash breakeven, zero new funding

$400K close: ₹68 L ARR at M15 (~31 mo runway) · $700K close: ₹1.06 Cr ARR, 2nd sales rep in M6

Series A-ready in Months 15–18 (~₹1.12 Cr ARR run-rate)

Every Indian investor deserves an analyst, a quant and a planner.

Anvest puts all three behind one question.

Institutional depth. Retail reach. One verified filings database.
