THE MARKET GAP & OPPORTUNITY

India's **13.4 Cr registered investors** and **3,900+ SEBI-registered analysts, PMS desks, and RIAs** are forced to choose between fragmented tools (static screeners, raw PDF filings, separate backtesters), opaque Telegram tip channels, and generic chatbots that hallucinate Indian accounting figures. Anvest unifies the entire investment decision loop: users ask a question in plain English, verify insights against cited exchange filings, launch dynamic multi-factor stock screens, and stress-test strategies in one connected workspace.

FULL-STACK PRODUCT LIVE IN PRODUCTION (ANVEST.IN)

Unlike single-point screeners or chat wrappers, Anvest pairs a proprietary **Indian filings warehouse** with deterministic calculation and simulation engines across three integrated pillars: **(1) Deep Filing & Portfolio Intelligence** (cited Q&A over 2.89M disclosures, natural-language AI Screener, and Portfolio X-Ray risk diagnostics), **(2) Systematic Quant & Strategy Engine** (multi-factor historical backtesting with Sharpe/drawdown metrics and live virtual paper trading), and **(3) Capital Allocation Suite** (interactive wealth goal simulators, SIP/SWP engines, and contextual decision guides). All core modules are live in production.

PROPRIETARY DATA MOAT & WHY ANVEST WINS

General LLMs fail on Indian markets because exchange disclosures are messy. Anvest built a custom ingestion, OCR, entity-resolution, and XBRL repair pipeline covering **6,137 companies** and **5,405 synthesized institutional profiles**—automatically fixing malformed post-FY23 NSE context dates, mining annuals from Q4 filings, and OCR-indexing scanned small-cap BSE PDFs. While Screener AI stops at isolated document chat and Streak stops at technical indicators, Anvest connects audited fundamental truth directly to systematic quant validation.

MULTI-LAYERED REVENUE MODEL & ORGANIC DISTRIBUTION

Anvest monetizes across four compounding channels: **(1) B2B Analyst & PMS Desk Seats** (Rs. 2,999/seat/month —delivering 10x ROI vs. legacy institutional terminals), **(2) Retail Pro & Quant Subscriptions** (Plus Rs. 199/mo, Pro Rs. 599/mo or Rs. 4,999/yr, Quant Rs. 1,499/mo), **(3) Zero-CAC Programmatic SEO & Creator Affiliates** (6,137 filing-cited company pages capturing long-tail search intent alongside SEBI-compliant educator partnerships), and **(4) Broker Execution Routing & B2B2C Data APIs** (licensing our cleaned XBRL/OCR intelligence API to fintechs and wealth platforms).

THE FUTURE OF ALGO TRADING & REGULATORY TAILWIND

Algorithmic trading now drives **67% of Indian equity derivatives and 54% of cash volume**. SEBI's landmark **April 2026 Retail Algo Framework** formalizes retail API access and mandates that black-box strategies be backed by a registered Research Analyst (RA) with maintained research reports. By combining our live strategy backtester, paper-trading journal, and upcoming SEBI RA registration, Anvest is uniquely positioned to become India's premier bridge from fundamental + quant screening to one-click, broker-connected algo execution.

FOUNDER & EARLY MOMENTUM

Harsh Bhardwaj (B.Tech ECE, IIT Guwahati; Senior Engineering Lead at New Relic building production agentic LLM systems; 7+ years in distributed systems at Shiprocket, Weave, and JLR) architected and shipped the entire Anvest stack solo in 12 months with zero outside capital. Over **100+ early users** have onboarded organically ($0 CAC), with paid B2B Desk and Pro Quant cohorts plus real-time filing alerts rolling out over the next 90 days.

THE SEED ASK & 15-MONTH SERIES A READINESS

Raising **$400K base (room to $700K) at a $3.5M post-money cap** via convertible instrument (CCD/CCPS) for 18+ months of runway. Funds core team expansion ($155K for Founding B2B Growth Lead, Senior Data Engineer & Broker API Engineer), SEBI RA licensing, exchange feeds & inference infra ($70K), and GTM scale plus reserve

($175K). **Month-15 targets:** 60+ B2B Desk & API teams (~300 seats), 1,750+ Pro/Quant subscribers, and **~Rs. 14.5 lakh net MRR (~$180K+ ARR run-rate)** with 30%+ DAU/MAU and 0.90+ published Recall@5.
