Anvest

India's AI investing co-pilot

Ask anything. Verify every number. Test before you invest.

Anvest Fintech Private Limited · anvest.in · Investor overview, October 2026

6,137 listed companies

2.89M corporate announcements

1.35M indexed filing passages

5,405 AI company profiles

991 mutual fund schemes

THE PROBLEM

13.4 crore Indians are registered investors, yet **9 in 10 individual F&O traders lost money in FY25** (₹1.06 lakh crore, SEBI). Decisions run on tips, scattered tools and chatbots that invent numbers on Indian filings. Investors don't lack information. They lack a trustworthy way to turn it into a decision.

THE PRODUCT, LIVE TODAY

One AI across research, testing and planning. Answers show the filings they draw on; if the data isn't there, Anvest says so.

Ask · Screen · Backtest · Practise · Execute: after approvals

- Grounded AI research copilot and natural-language screener
- 6,137 stock pages with Anvest Score, AI profiles and filings
- Backtests with Indian costs; paper trading and journal
- IPO hub, mutual fund X-ray, bonds and G-Secs
- Wealth, retirement and market stress simulators
- Read-only Zerodha and Groww portfolio link

WHY NOW

- **AI can read filings**, but only verified, citable data earns trust.
- **Retail algos are regulated:** SEBI's framework applies to all brokers from 1 April 2026; black-box providers must be RAs and exchange-empanelled.
- **Brokers are agent-native:** Kite MCP and peers expose accounts to AI agents.
- **Algorithms drive 54% of NSE cash-market turnover** (67% in derivatives): context, not proof of retail demand. Live execution comes later, via partner brokers after approvals.

THE MOAT

A year of compounding production fixes: malformed-XBRL repair, OCR of scanned small-cap filings, Q4-embedded annual figures and sector-aware checks. The chatbot is replaceable; the verified corpus is not.

WHY CUSTOMERS CHOOSE ANVEST

Trendlyne offers AI screener creation and screener backtests; Screener.in sells AI document credits; StockGro's Stoxo offers AI research and a strategy builder. Anvest carries one question from cited evidence to an editable screen, a costed backtest and a paper trade, next to fund, bond and retirement planning. Head-to-head benchmark: a month-15 milestone.

MARKET

$1.3B / yr	TAM: every active NSE client on Plus, plus every advice and distribution professional on Desk
$247M / yr	SAM: ~96 lakh active traders, plus 3,900 SEBI-registered research, advisory and PMS firms
$3.1M ARR	Year-5 scenario (conditional): about 1% of SAM

FOUR REVENUE ENGINES

Plus and Pro
Planned ₹199–₹599 / month
Retail: AI answers, backtests, alerts, portfolio X-ray

Desk
Planned ₹2,999 / seat / month
Analysts, PMS, advisers and distributors

Intelligence API and MCP
Licence + usage
Brokers, wealth apps and AI agents embed Anvest

Strategies and algo
Subscription + revenue share
Via partner brokers, after RA registration and empanelment

TRACTION AND TEAM

Built and live in twelve months with no outside capital and no marketing spend, with ~100 organic sign-ups (Oct 2026) before any launch campaign. Runs on Google Cloud (Mumbai) and Vercel with nightly ingestion and encrypted backups.

Harsh Bhardwaj, Founder: IIT Guwahati; Senior Engineering Lead at New Relic building agentic LLM systems; seven years in backend and distributed systems (Shiprocket, Weave, Jaguar Land Rover). First hires: growth and partnerships, data engineering, full-stack and quant.

THE ASK

$400K–$700K at a $3.5M post-money cap

CCD/CCPS, identical terms for every investor. The base plan spends ~₹3.0 Cr over 18 months on three hires, SEBI RA registration, a data licence, scaled serving, Desk pilots and launch, and keeps a 17.5% reserve.

₹83 L ARR run-rate at month 15 (base)	**43** Desk teams; 2 paying partners	**RA** SEBI registration and a public benchmark
₹1.2 Cr ARR with the $700K upsize	**~25 mo** runway at month-18 burn	**~₹30 Cr** ARR in the year-5 scenario

Sources: SEBI FY25 F&O study (Jul 2025); NSE Market Pulse (Jul–Aug 2026); NSE Market Pulse (Dec 2025) for algo shares; SEBI intermediary directory (Oct 2026); SEBI retail algo circular (Feb 2025, glide path Sep 2025). Figures come from the operating model: targets and a conditional scenario, not forecasts. Pricing is planned.
