Anvest

India's AI research co-pilot

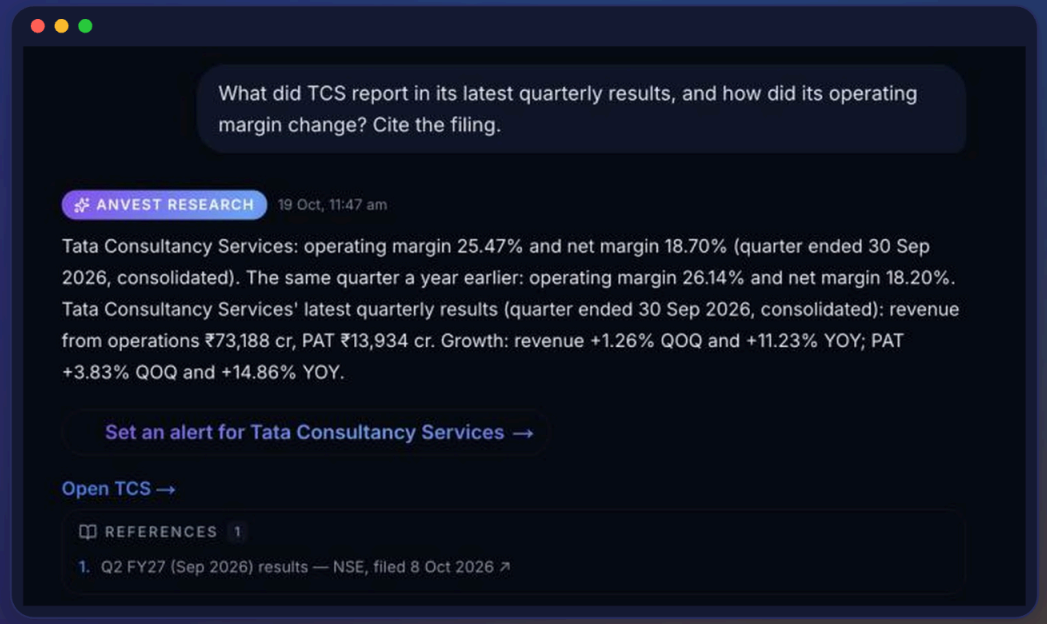

Cited filing answers, costed backtests and portfolio impact, for SEBI-registered professionals and serious investors.

6K+
listed companies

2.94M
corporate announcements

1.35M
indexed filing passages

~49K
announcements/month, Q2 FY27

Live answer, 19 Oct: net margin = PAT / total income (₹74,525 Cr). Operating margin fell 67 bps YoY.

Harsh Bhardwaj, Founder · harsh@anvest.in · anvest.in · Seed round, October 2026

THE PROBLEM

Advisers and investors decide without verified research

~49,000

announcements/month, Q2 FY27

Results, pledges and board notices land on NSE and BSE daily. Analysts, advisers and PMS desks still read them by hand, often as scanned PDFs.

Scattered

research, backtest and desk tools

Professionals and investors jump between exchange PDFs, ratio screeners, backtesters and spreadsheets, losing hours and context at every hop.

Unverified

answers from general-purpose AI

Chatbots sound confident but can invent figures on Indian filings. Without a verified filings warehouse underneath, their answers can't be checked.

3,900 SEBI-registered firms and 13.4 crore investors don't lack information. They lack a trustworthy way to turn it into a decision.

Warehouse, announcement date: Jul 45,997 · Aug 61,875 · Sep 38,558 (2026) · Q2 FY27 average 48,810/month · extracted 20 Oct 2026

THE SOLUTION

From a question to a tested strategy, in one flow

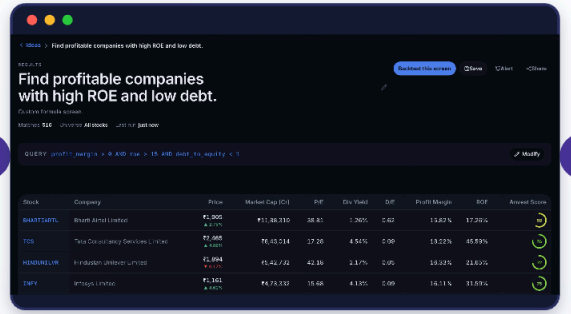

1 ASK

Ask in plain English

“Find profitable companies with high ROE and low debt.”

2 SCREEN

AI builds the screen

Intent becomes explicit, editable filters across 6K+ companies, with a one-click backtest.

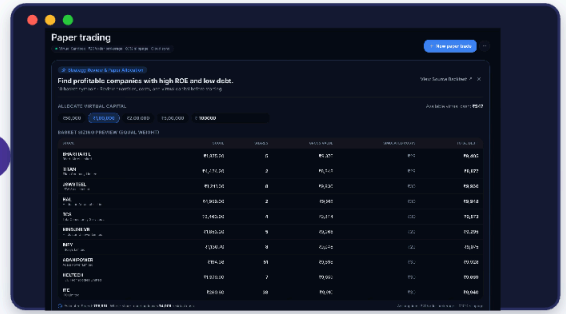

3 BACKTEST

Test it on history

Brokerage, STT, stamp duty and slippage built in; alpha, drawdown and Sharpe reported, with every rule shown.

4 PRACTISE

Practise, then act

Paper-trade the strategy with virtual cash and review every decision in a journal.

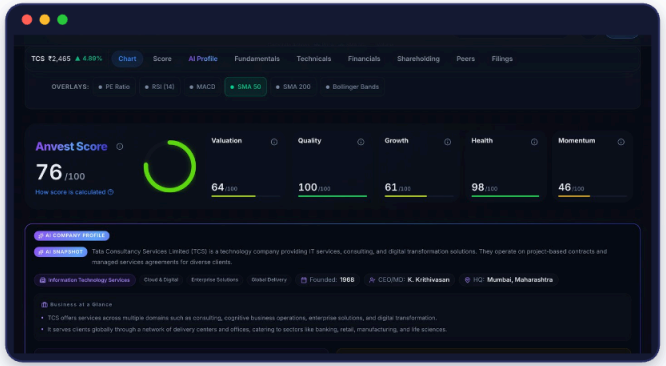

Verified live on 19 Oct 2026: this prompt generated a 516-stock screen (ROE > 15%, D/E < 1), a 1Y costed backtest and a 10-stock paper basket.

AI interprets. Engines compute: the model never does the arithmetic, and answers link back to their sources.

LIVE TODAY

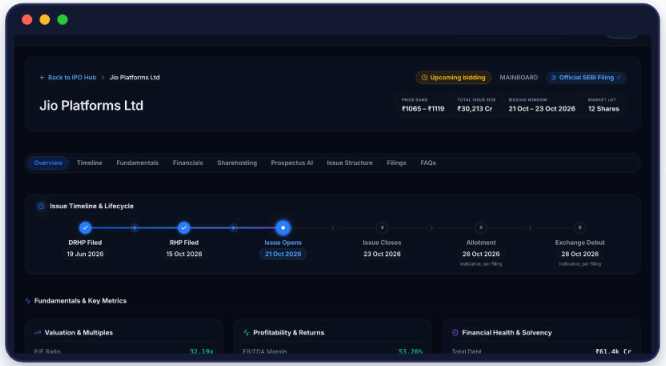

One verified data engine, six live workflows

Every module is a view on the same filings warehouse, not a separate product to maintain.

Stock intelligence

Anvest Score, AI profile, financials and filings

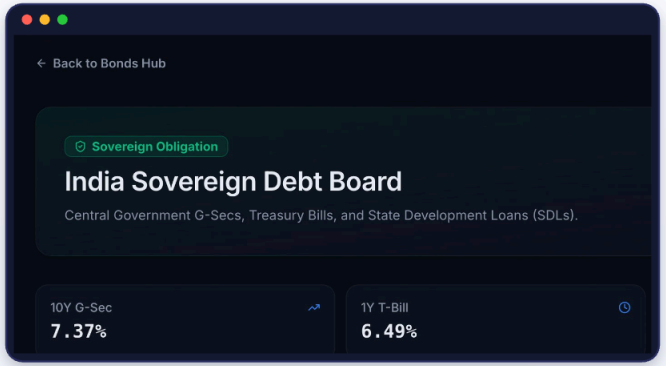

IPO hub

Jio Platforms: band, size and dates from its RHP (Oct 2026)

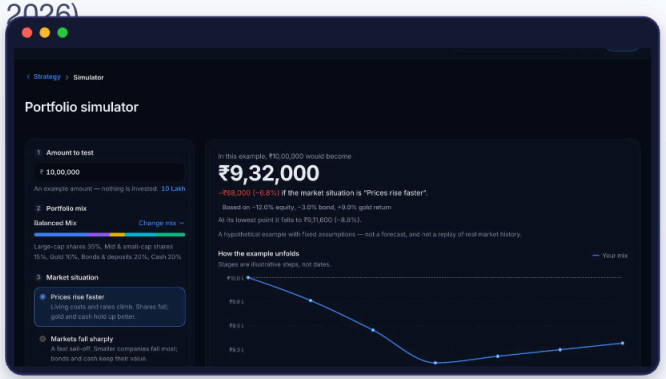

Mutual fund X-ray

991 schemes compared on returns, cost, risk and overlap

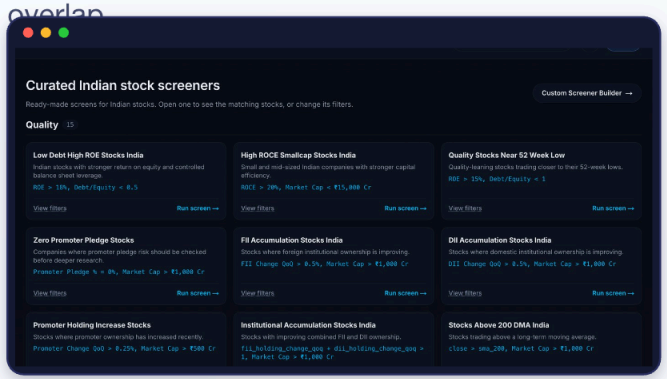

Bonds and fixed income

G-Sec board, T-bill yields and the 10Y benchmark

Market stress simulator

How a portfolio behaves in a sell-off or an inflation shock

Curated screens

Promoter buying, FII and DII accumulation, quality

TRACTION

Built and live, with auditable source checks

SHIPPED AND LIVE

- Grounded AI research copilot
- Natural-language stock screener
- 6K+ stock pages; 6,119 AI profiles
- Backtesting with Indian costs
- Paper trading and trade journal
- IPO hub with prospectus analysis
- Mutual fund X-ray: cost and overlap
- Bonds, G-Secs and yield tools
- Wealth, retirement and stress simulators

50 / 50 recent filings: revenue and PAT matched NSE XBRL (20 Oct 2026)

418 research queries logged across 16 accounts, including internal testing

238 saved backtest records, including internal testing

12 months from first commit to full platform, no outside capital

Production snapshot, 20 Oct 2026: 31 accounts, 2 saved screens. Usage includes founder/testing. Source checks measure extraction, not AI answer accuracy.

WHY NOW

Four shifts make this the moment

AI can finally read filings

Language models can now read and explain filings. Trust depends on verified, citable data underneath, which is what Anvest has built.

SEBI has set the algo rules

SEBI's framework (in force April 2026) requires exchange empanelment for algo providers and RA registration for black-box strategies. Anvest works in white-box research and backtesting today.

Brokers are going agent-native

Zerodha's Kite MCP and peers now expose accounts to AI agents. Those agents need a grounded research brain behind them.

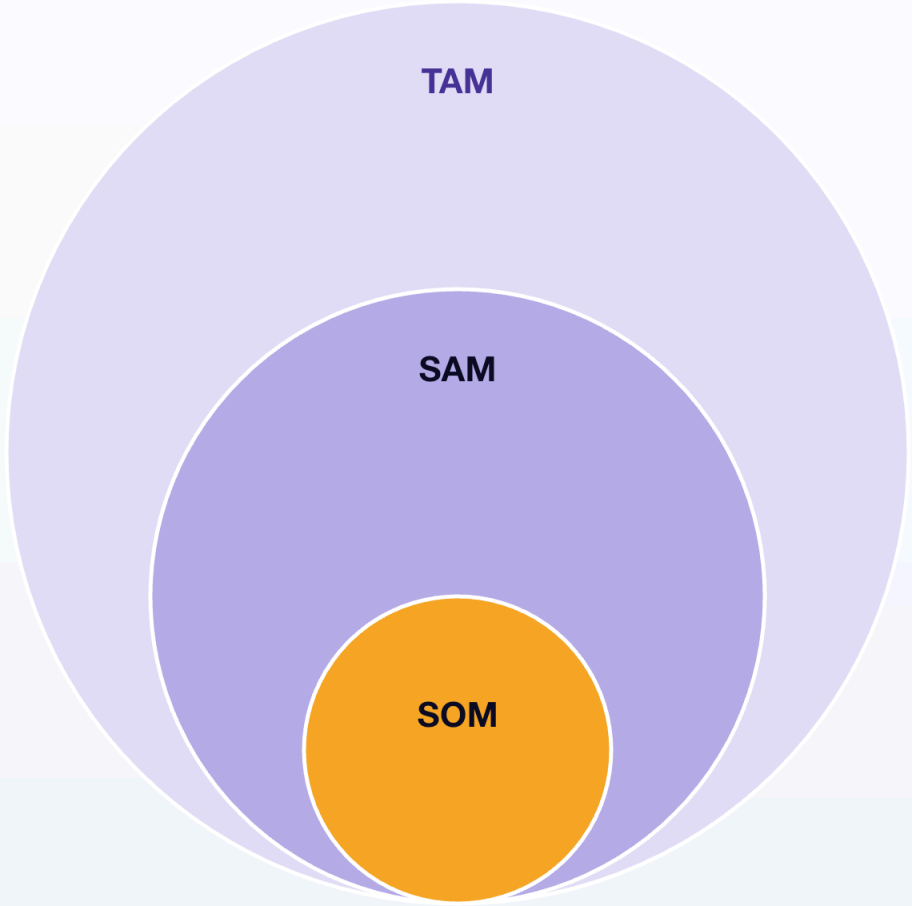

A new generation of investors

13.4 crore unique investors are registered with NSE, while regulators push for explained, accountable research.

Investors already pay for source-cited AI research: AlphaSense reached $600M+ ARR at a $7.5B valuation (Jun 2026) on enterprise seats. Anvest Desk brings it to Indian desks at ₹2,999 a seat a month (~$380 a year).

SEBI circulars of 4 Feb 2025 and 30 Sep 2025 · Zerodha Kite MCP · NSE Market Pulse, Jul 2026 · fintech.global, Jun 2026

A $1.3B market, starting with professional teams

₹12,269 Cr · $1.3B / yr

Investors ₹10,985 Cr (4.6 Cr active NSE clients on Plus) + professionals ₹1,284 Cr (3.55 lakh SEBI firms and distributors on Desk)

₹2,371 Cr · $250M / yr

Active investors ₹2,292 Cr (~96 lakh active traders) + professionals ₹78 Cr (3,900 SEBI firms and 3,350 top distributors, 3 seats each)

₹23 Cr · $2.4M ARR

Year-5 scenario across all engines: ~1% of SAM. Desk expands beyond the initial professional segment.

Why professionals first: a small, high-intent SAM (₹78 Cr) we can reach with two sellers, paying from month 3, who make the product credible. Scale then comes from active investors and partner distribution.

List prices: Plus ₹2,388/yr, Desk ₹35,988/seat-yr. NSE Market Pulse (Aug 2026) · SEBI FY25 trader study · SEBI directory (Oct 2026) · ARN+EUIN holders and FY26 top MFDs (Cafemutual)

COMPETITION

Others own a slice. Anvest connects the whole task

	Cited filing answers	Plain English → screen	Backtest with costs	Paper trading	Portfolio & planning	Live execution
Anvest	**Yes**	**Yes**	**Yes**	**Yes**	**Yes**	Next: after approvals
Screener.in	Partial: metered AI credits	Partial: query language	—	—	—	—
Tijori	Partial: filing timeline	**Yes: natural language**	—	—	Partial: stock & MF tracking	—
Trendlyne	Partial: AI concall summaries	**Yes: AI screener**	Partial: screener backtests	—	Partial: portfolio report	Partial: baskets
Tickertape	—	Partial: filter screeners	—	—	Partial: MF tools	—

Streak	—	Partial: technical scanners	**Yes: technical rules**	**Yes**	—	**Yes: via Zerodha**
General AI chat	Partial: no verified Indian data	—	—	—	—	—

Anvest carries one question from cited filing evidence to an editable screen, a costed backtest and a paper trade, with fund, bond and retirement planning in the same account.

Yes = core feature · Partial = limited or adjacent · — = not found on the vendor's public product pages, checked 19 Oct 2026

THE MOAT

The moat is the data engine beneath the AI

Ingest
Prices, filings, XBRL, NAVs and prospectuses, every night

Repair and OCR
Fixes malformed exchange filings; reads scanned PDFs

Verify
Identity checks, cross-validation, sector-aware rules

Ground
Cite the filing, or say the data isn't there

Serve
One AI across research, screens, backtests and plans

15,899
cash-flow rows recovered from malformed XBRL

3,608
conflicting source figures flagged across 1,022 companies

10 of 10
tier-1 bank results in a Q1 FY27 sample were scans

2.94M
corporate announcements in the warehouse

1.35M
indexed passages, refreshed daily

Why incumbents can't simply bolt this on: a screener built on structured data feeds would have to re-ingest, OCR and repair the raw filing corpus to cite at passage level. NSE's post-FY23 XBRL mislabels its periods, annual figures hide inside Q4 filings, and many filings are scans; each fix took production queries to find.

Internal data-quality audits, Jul–Sep 2026

BUSINESS MODEL

Two engines fund the seed stage; two more scale it

THIS ROUND

Anvest Desk

₹2,999 / seat / month · 1–5+ seats

For RAs, IAs, PMS desks and distributors: coverage-list filing digests, cited research and shared workspaces. Paying from month 3.

FIRST REVENUE

Intelligence API and MCP

Licence, tiered per active user

Brokers, wealth apps and AI agents embed Anvest's grounded answers. Pilot in weeks; first paid partner at month 10.

PILOT-READY

SELF-SERVE AND LATER

Anvest Plus and Pro

LAUNCH PRICING

₹199–₹599 / month (Pro ₹4,999 / year)

Self-serve upside from free pages and tools: 150–600 AI questions a month included, plus backtests, alerts and portfolio X-ray.

Strategies, baskets and algo

AFTER APPROVALS

Subscription + revenue share

RA-backed model baskets and exchange-registered strategies through partner brokers, after RA registration and empanelment (post-Series A).

Month-15 revenue mix at $500K: Desk 75%, partners 20%, self-serve 5%. Checkout goes live in the first 90 days.

GO-TO-MARKET

Land with professionals. Compound through partners

Professional seats

Founder-led sales to 3,900 SEBI-registered firms, starting with 1–5 seat boutiques, then distribution professionals.

Search built from source data

6K+ stock, 991 fund, IPO and bond pages answer long-tail filing queries; the full sitemap ships in the first 90 days.

Partners and AI agents

Broker and wealth-app integrations through API and MCP reach investors without paid acquisition.

Shareable answers and creators

Every cited answer, screen and backtest is a shareable link; education creators join on referral terms within SEBI's rules.

FIRST 90 DAYS AFTER CLOSE

WHERE THIS GOES

Retail trading is going algorithmic. Anvest is the on-ramp

54%

of NSE cash-market turnover is algorithmic

67%

of equity-derivatives turnover (73% in stock futures)

1 Apr 2026

SEBI's retail algo framework applies to all brokers

Execution is automated and regulated; pre-trade research and testing is the open space.

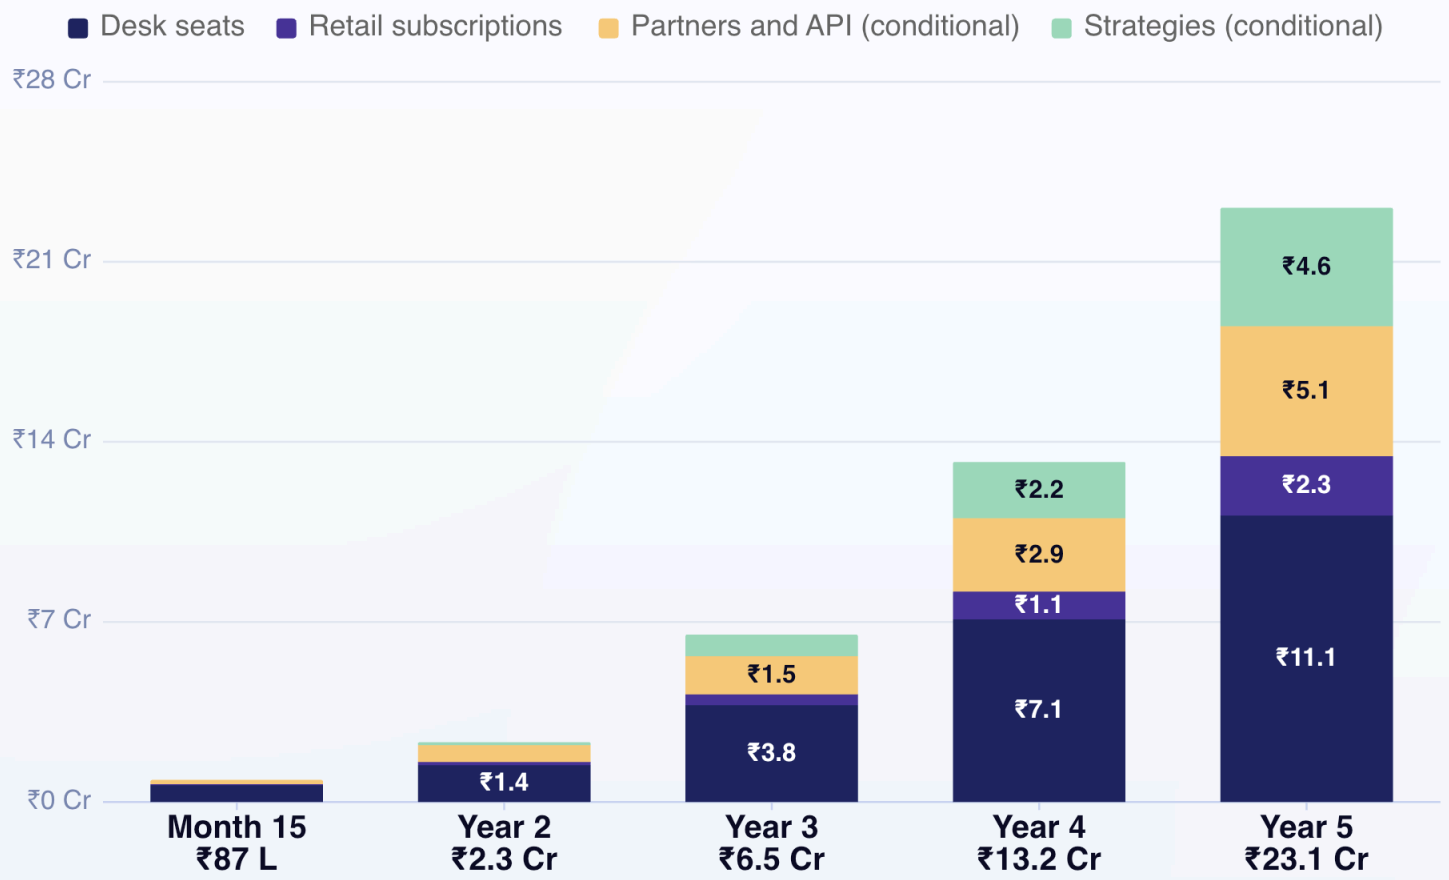

Idea	Ask in plain English	LIVE
Rules	Transparent rules on fundamentals and technicals (P/E, ROE, RSI, SMA)	LIVE
Evidence	Costed backtests with periodic rebalancing, not intraday	LIVE
Practice	Paper-trade with virtual cash	LIVE
Live	Deploy through partner brokers after RA registration and empanelment	NEXT

Anvest's lane: fundamental and filing-driven rules, rebalanced periodically, built and tested in the open. Exchange algo volumes are mostly intraday and high-frequency; this is the investor-grade layer before them.

NSE Market Pulse, Dec 2025 (turnover share, FY26 to Nov) · SEBI retail algo circulars, 4 Feb 2025 and 30 Sep 2025

FINANCIAL PLAN

Default-alive on $500K, Series A path to ~₹23 Cr ARR

THIS ROUND · MONTH 15

	$400K	$500K	$700K
ARR run-rate	₹68 L	₹87 L	₹1.06 Cr
Desk teams	55	77	88
Paying partners	2	2	3
Net burn / month	₹13.9 L	₹15.4 L	₹15.6 L
Break-even month	M48*	M42	M40

**$400K funds months 1–31; break-even then needs a top-up. $500K and $700K need no new funding.*

SERIES A SCENARIO

- Series A near month 18 adds sellers (15 incl. founder by year 5)
- Strategies only after RA registration and empanelment
- Partner licences tiered: ₹15 → ₹10 → ₹6 per user

No-new-funding path: M42 break-even on $500K. Series A scenario: ₹13.4 Cr Desk/retail + ₹9.7 Cr partners/strategies ≈ ₹23.1 Cr Year-5 ARR. ₹95 = $1.

TEAM

A founder who has already built the hard part

Harsh Bhardwaj

Founder · full-time on Anvest from the close of this round

- B.Tech, Electronics and Communication, IIT Guwahati (2015–19)
- Senior Engineering Lead building production agentic LLM systems
- Seven years building high-throughput backend and distributed systems at New Relic, Shiprocket, Weave and Jaguar Land Rover
- Solo-built Anvest's XBRL repair pipeline, verification engine and nine-module platform in 12 months, with no outside capital

FIRST HIRES FROM THIS ROUND

1. **Growth and partnerships lead**
   Sells Desk pilots and broker integrations
2. **Data engineer**
   Owns ingestion, coverage and data quality
3. **Full-stack and quant engineer**
   Strategies, alerts and the path to live algos
4. **Second seller (with $500K)**
   Joins in month 9 to scale Desk sales

Adviser bench in SEBI compliance and capital markets: being built this round.

Domain edge already earned in production: malformed XBRL periods, Q4-only annual figures and scanned PDFs, all solved.

THE ASK

Raising $500K to prove Desk demand and partner reach

$3.5M post-money cap · CCD/CCPS · identical terms · first close at $400K, room to $700K

$185K — 37%

Team

Growth lead, data engineer, full-stack and quant engineer, second seller from month 9

$65K — 13%

Compliance and infrastructure

SEBI RA registration, exchange data licence, serving and inference

$100K — 20%

Growth and founder

Desk pilots, launch, CAC tests and founder salary

$150K — 30%

Reserve and runway

Keeps cash above ₹51 L on the path to break-even

$500K DELIVERS BY MONTH 15

₹87 L
ARR run-rate (~$92K)

77
Desk teams (~243 seats)

2
paying partner integrations

RA
SEBI research-analyst registration

Public
head-to-head accuracy benchmark

M42
break-even without new funding

$400K first close: ₹68 L ARR at month 15, cash for ~31 months · $700K: ₹1.06 Cr ARR, second seller from month 6

Series A-ready in 15–18 months

Every Indian investor deserves an analyst, a quant and a planner.

Anvest puts all three behind one question.

Institutional depth. Retail reach. One verified data engine.

Book a live demo and data-room walkthrough: harsh@anvest.in

Scan: a live screen, no sign-in

Harsh Bhardwaj · harsh@anvest.in · live at anvest.in

APPENDIX

Trust and compliance, built in

Data accuracy	Answers show the filings they draw on and pass a numerical check against that evidence before they are returned. Coverage gaps are shown, not estimated. Corrections ship as versioned releases.
Verification proof	Source audit, 20 Oct 2026: revenue and PAT matched 50 of 50 recent consolidated NSE XBRL filings. This checks extraction, not full AI answers. A separate four-question live spot-check and a future independent benchmark cover answer quality.
Regulation	Informational by design: no buy, sell or hold calls and no target prices. SEBI RA registration is funded in this round and positions Anvest for the retail algo framework.
Market data	End-of-day exchange data today; licensed exchange and delayed feeds budgeted this round for Desk teams and public pages, plus broker links for retail portfolios.
Key-person depth	Runbooks, health-checked nightly jobs and documented architecture. The first hires add data and customer-facing depth.

APPENDIX

Operating model: the month-15 bridge

Engine	Drivers	$400K	$500K	$700K
Desk seats	Founder 1 team/month; each seller 4 teams/month once ramped; 1–5 seat plans averaging 3 seats; 2% monthly churn; ~₹2,245 net per seat	**₹3.9 L**	**₹5.5 L**	**₹6.2 L**
Partners	Paid from months 10 and 14 ($700K: 9, 12, 15); 4,000 active users each growing 6%/month; tiered ₹15 → ₹10 → ₹6 per user	**₹1.4 L**	**₹1.4 L**	**₹2.2 L**
Retail	10,192 monthly users; 0.3% convert each month; 5% monthly churn; ~₹200 net per subscriber	**₹0.4 L**	**₹0.4 L**	**₹0.5 L**
Net MRR, month 15	After 18% GST and launch discounts; ARR run-rate = MRR × 12	**₹5.7 L**	**₹7.3 L**	**₹8.8 L**

Unit economics ($500K): gross margin ~46% at month 15 (fixed serving and data costs on a small base), ~83% at year-5 scale · Desk CAC ≈ ₹0.73 L per team, repaid by ~11 months of team revenue · net burn ₹15.4 L/month at month 15; break-even ~month 42.

Bottom-up monthly operating model: 18% GST, payment fees, AI serving per answer, exchange data licence, compliance, salaries by hire month. ₹95 = $1.

APPENDIX

Long-term scenario: drivers and conditions

Exit	Sellers	Monthly users	Retail subs	Desk seats	Partners (users)	Strategy subs	ARR
Month 15	3	10,192	186	243	2 (9,593)	—	**₹87 L**
Year 2	6	24,015	496	532	4 (37,466)	362	**₹2.3 Cr**
Year 3	10	84,016	1,746	1,395	6 (94,213)	2,810	**₹6.5 Cr**
Year 4	13	1,69,058	4,519	2,634	8 (1,97,638)	7,296	**₹13.2 Cr**
Year 5	15	3,40,177	9,635	4,132	10 (3,83,373)	15,349	**₹23.1 Cr**

Sellers include the founder. By Years 3–5, Desk targets broader distributors, family offices and CA/wealth practices, beyond the initial 21,750-seat SAM (4,132 seats would be 19% of it).

Series A near month 18

Funds sellers and marketing; monthly-user growth 11% a month to month 36, then 6%

Partner contracts

Eight more integrations from month 20 at 10,000 users each, growing 5% a month; tiered ₹15 → ₹10 → ₹6 per active user

Strategies

From month 22 only after SEBI RA registration, exchange empanelment and a partner broker; ₹250 a month net per subscriber

APPENDIX

Every capability has a commercial job

Product capability and roadmap	Commercial role	Engine
AI research and screening	Frequent research tasks that drive subscriptions	Plus, Pro, Desk
Backtesting, paper trading and journal	Repeated strategy evaluation and a reason to upgrade	Pro
Wealth planning, calculators and guides	Organic discovery and recurring planning needs	Free to Plus
Coverage lists; team workspaces planned	Higher-value team subscriptions	Desk
Broker and API integration	Paid distribution of proven research capabilities	Partners and API
Approved strategy execution (future)	Monetising an established testing workflow	Strategies

Free calculators, IPO pages and curated screens support organic discovery. Conversion into Pro and Desk will be measured after launch.

APPENDIX

Roadmap

M1–6	THIS ROUND **Launch**	Checkout live, 10 paid Desk pilots, ~16 Desk teams, full sitemap, benchmark published, SEBI RA application filed.
M7–12	THIS ROUND **Scale Desk, first partner**	~54 Desk teams, second seller from month 9, first paid broker or wealth-app integration live (month 10), SEBI RA approval.
M13–18	THIS ROUND **Series A-ready**	~99 Desk teams, second paid partner, ₹1.12 Cr ARR run-rate at month 18; raise the Series A.
H2	SERIES A **Scale the platform**	More partners and AI-agent distribution, team plans for advisers and distributors, alerts on every holding.
H3	GROWTH **From insight to execution**	Exchange-registered strategies through partner brokers, a strategy marketplace and advanced quant research for desks.

This round funds months 1–18; each later business line carries its own approvals and business case.
