# Anvest

## Filing research for Indian teams

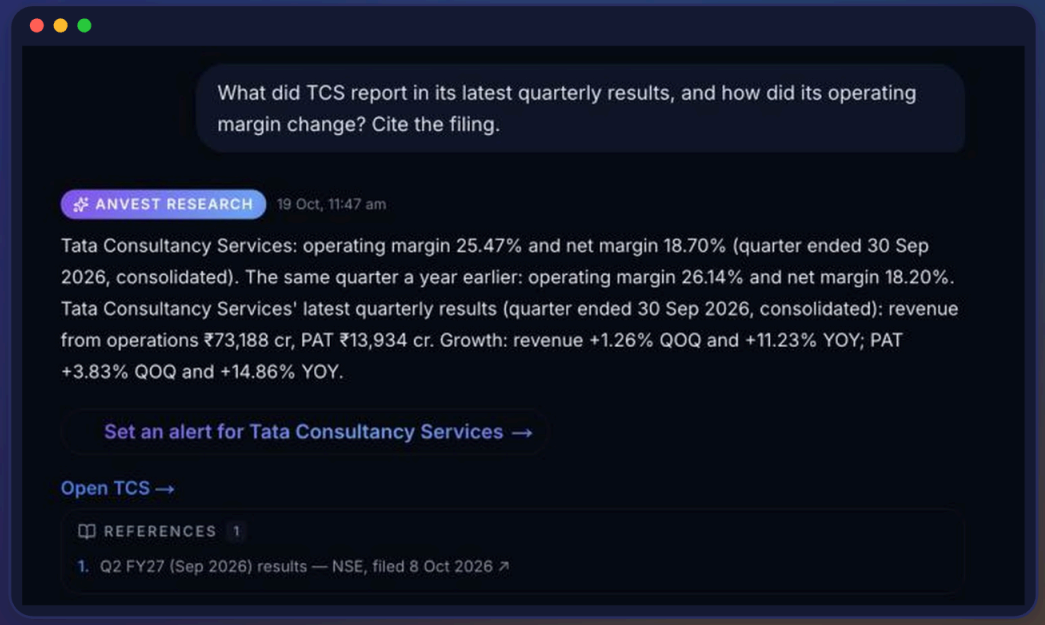

Cited research and Indian-cost backtests for teams.

**6K+**
listed companies

**2.94M**
corporate announcements

**6.16M**
indexed filing passages

**~49K**
announcements/month, Q2 FY27

*TCS Q2 FY27: revenue ₹73,188 Cr; PAT ₹13,934 Cr; net margin uses total income. Operating margin 25.47%, down 67 bps YoY. Source: NSE filing, 8 Oct 2026.*

Harsh Bhardwaj · harsh@anvest.in · anvest.in · Version 1 Nov 2026

THE PROBLEM

# Advisers and investors decide without verified research

## ~49,000

**announcements/month, Q2 FY27**

Exchange filings, summary screeners, backtesters and spreadsheets can leave research teams moving between disconnected sources and tools.

## Scattered

**research, backtesting & advisory tools**

Important context may sit in filing text or scanned documents. Anvest links answers to indexed source passages and carries research into screens and costed tests.

## Unverified

**answers from general-purpose AI**

General-purpose language models can produce unsupported figures. Anvest retrieves source passages and applies numerical checks; this reduces risk but does not guarantee error-free answers.

**The operating model starts with a 21,750-seat professional segment. Customer demand and willingness to pay remain to be tested.**

*Warehouse, announcement date: Jul 45,997 · Aug 61,875 · Sep 38,558 (2026) · Q2 FY27 average 48,810/month · extracted 20 Oct 2026*

WHY NOW

# Research tools need reliable source links

## Filing access and validation

Language models can help navigate disclosures. Anvest links filing answers to indexed passages and applies deterministic numerical checks; this does not establish error-free outputs.

## Research and algo rules have distinct scopes

SEBI research-analyst rules address disclosure of AI use. Retail-algo requirements apply to broker activity from 1 Apr 2026; black-box providers have specific RA and empanelment requirements. Anvest backtests and paper trading are simulations.

## Partner access remains to be scoped

Broker account access would require a partner-approved method, user consent and agreed data controls. No Anvest broker integration or pilot is agreed.

## Initial buyer segment

The operating model sizes 3,900 RA, PMS and IA firms for TAM and uses a narrower professional SAM. These counts do not establish customer demand.

**Seed-stage model: Anvest Desk list price is ₹2,999/seat/month; Month-15 revenue, customer count and CAC recovery are planning outputs, not observed results.**

*Sources: SEBI Research Analyst Regulations (Dec 2024 amendments); SEBI retail-algo circulars (Feb and Sep 2025); operating model.*

THE MOAT

# Production pipeline repairs and indexes filing data

### 1. Ingest

Prices, PDF filings, exchange data (XBRL), fund NAVs & IPO prospectuses

### 2. Repair & OCR

Fixes corrupted or mislabeled exchange feeds; reads scanned PDF tables

### 3. Cross-Verify

Accounting-identity checks, cross-source validation & sector rules

### 4. Cite Source

Links every number to the exact filing passage—or flags missing data

### 5. Power All Tools

One verified database drives AI answers, screens, backtests & plans

**15,899**

cash-flow rows recovered from corrupted exchange feeds (XBRL)

**3,608**

conflicting source figures flagged across 1,022 companies

**10 of 10**

bank filings in a Q1 FY27 sample were scanned PDFs needing OCR

**2.94M**

corporate announcements in the warehouse

**6.16M**

indexed filing passages counted on 20 Oct 2026

**The pipeline combines source ingestion, XBRL repair, OCR, cross-checks and filing lineage. Public-page comparisons are directional and do not establish what competitors can or cannot build.**

*Production snapshot 20 Oct 2026: 6,155,194 passages / 633,688 distinct doc_ids.*

THE SOLUTION

# From a question to a tested strategy, in one flow

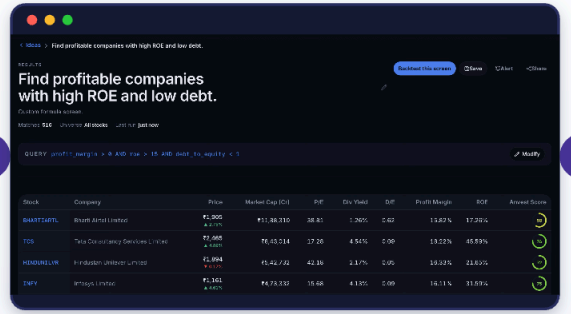

1 ASK

## Ask in plain English

"Find profitable companies with high ROE and low debt."

2 SCREEN

## AI builds the screen

Plain English becomes transparent, editable filters across 6,000+ stocks, with a one-click backtest.

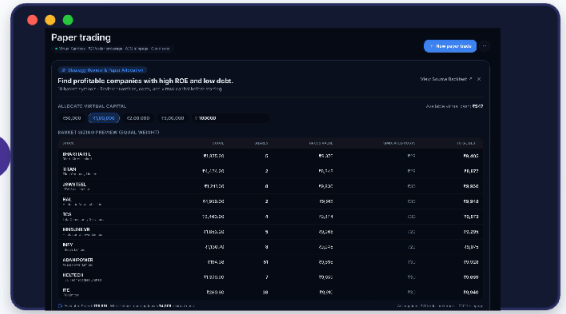

3 BACKTEST

## Backtest it on history

Brokerage, security taxes (STT), stamp duty, and slippage built in; alpha, drawdown, and Sharpe shown.

4 PRACTISE

## Practise, then act

Paper-trade the strategy with virtual cash and review every decision in a journal.

*Product replay, 19 Oct 2026: a research prompt generated a 516-stock screen, costed backtest and paper basket. This is a product test, not customer traction.*

**The model interprets the request; deterministic code performs calculations. Filing answers link to source evidence, with unsupported coverage stated.**

TRACTION

# Built and live, with auditable source checks

SHIPPED AND LIVE

- Source-cited AI research copilot
- 6K+ stock pages; 6,119 AI profiles
- Paper trading and trade journal
- Mutual fund X-ray: cost and overlap
- Wealth, retirement and stress simulators
- Natural-language stock screener
- Backtesting with Indian taxes & fees
- IPO hub with prospectus analysis
- Bonds, G-Secs and yield tools

**50 / 50** consolidated Q2 FY27 NSE XBRL filings: revenue/PAT extraction matched (20 Oct 2026)

**418** research rows across 16 accounts; includes internal/testing activity

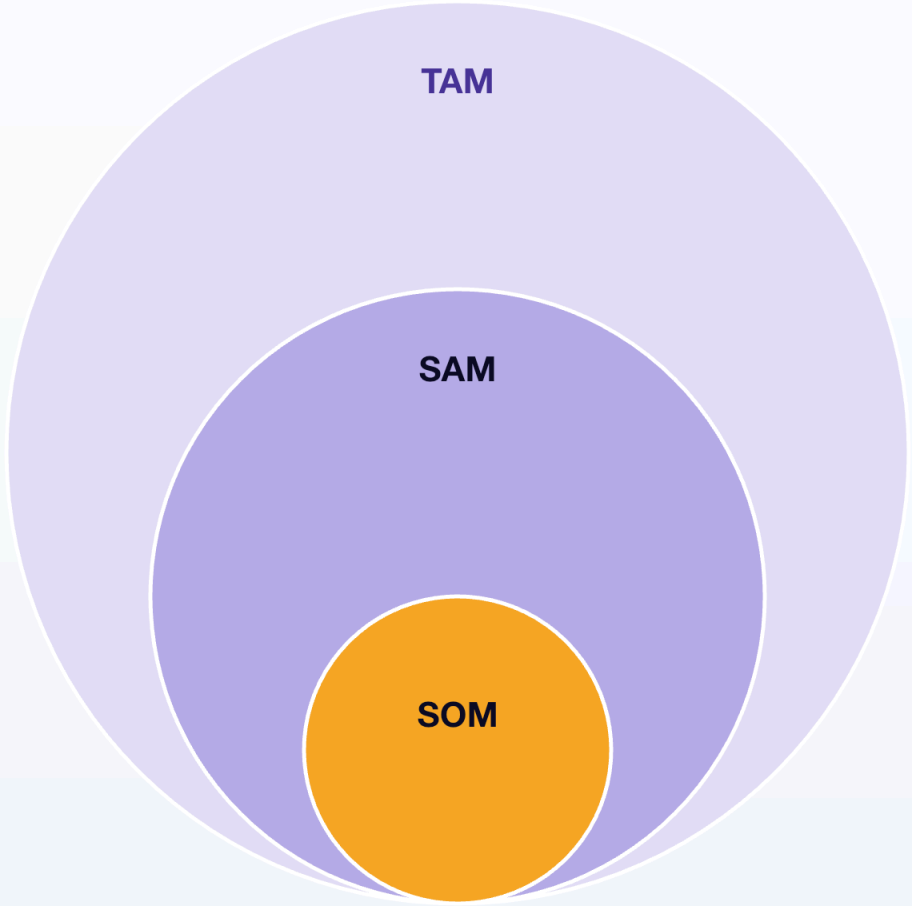

**238** saved backtest records; includes founder/testing activity

**12 months** from first code commit to live 9-module platform, zero outside capital

**Output safeguards include numerical checks against source evidence, explicit coverage limits and no buy/sell recommendations. This is not a compliance certification.**

MARKET

# A $1.3B market, starting with high-intent advisory teams

## ₹12,269 Cr · $1.3B / yr

Individual investors ₹10,985 Cr (4.6 Cr active NSE accounts at ₹2,388/yr) + financial professionals ₹1,284 Cr (3.55 lakh SEBI-registered firms & mutual fund distributors at ₹35,988/seat/yr)

## ₹2,371 Cr · $250M / yr

Active retail traders ₹2,292 Cr (~96 lakh active traders) + core advisory teams ₹78 Cr (3,900 SEBI-registered firms & 3,350 top fund distributors, averaging 3 seats per firm)

## ₹23 Cr · $2.4M ARR

Year-5 target across all four revenue streams (~1% of SAM), as advisory team plans expand to wealth practices, family offices, and chartered accountants.

**Why start with advisory firms: the model identifies a ₹78 Cr professional SAM and assumes direct sales. Revenue begins in the plan in Month 3; no paid customer or willingness-to-pay evidence is claimed.**

*Model list prices: Plus ₹2,388/year; Desk ₹35,988/seat/year. Values are model inputs, not validated willingness to pay. · Sources: NSE Market Pulse (Aug 2026) · SEBI FY25 study & directory (Oct 2026) · Cafemutual MF distributor data*

*TAM: Total Addressable Market, SAM: Serviceable Available Market, SOM: Serviceable Obtainable Market*

BUSINESS MODEL

# B2B subscriptions fund the Seed stage; retail scales Series A

## SEED MODEL MIX (95% OF MONTH-15 ARR)

### 1. Anvest Desk

**₹2,999 / seat / mo · Advisory Teams**

For research and advisory teams: filing research, screening and shared workflows. Model revenue starts in Month 3; no paid customers are reported today.

75% OF M15 ARR

### 2. Broker & Wealth API

**Tiered: ₹15 → ₹10 → ₹6 / active user**

Brokers and wealth apps could embed filing answers and screeners via API, subject to partner approval and data terms. The model targets two paid partners by Month 15; none are signed.

20% OF M15 ARR

## INDIVIDUALS & POST-SERIES A SCENARIO

### 3. Anvest Plus & Pro (Individuals)

5% OF M15 ARR

**Individual subscriptions · conversion remains to be measured**

Public pages and free tools are an acquisition hypothesis. Search traffic, upgrade rates and feature demand have not been documented in a dated analytics export.

### 4. Licensed Model Portfolios

POST-SERIES A

**₹250 / mo net subscription + broker revenue share (scenario from Month 22)**

Ready-to-invest stock baskets and periodically rebalanced rules deployed via partner brokers—launched in Year 2 once SEBI Research Analyst and exchange approvals are complete.

**$500K model target at Month 15: ₹87 L ARR; 75% Desk, 20% Broker APIs, 5% individual plans. Targets and launch timing are assumptions.**

COMPETITION

# Research tools cover different parts of the workflow

| | Anvest | Summary tools | Filing tools | Technical tools | General LLMs | Review scope |
|---|---|---|---|---|---|---|
| **Focus** | **Filing-to-test** | **Company metrics** | **Filing discovery** | **Price/volume** | **Broad Q&A** | Category only |
| **Evidence** | Passage citations | Varies | Filings | Price data | Prompt context | Public pages |
| **Screening** | Editable rules | **Screener tools** | Varies | Technical filters | No market rules | Not tested |
| **Testing** | Indian charges | **Varies** | Varies | Strategy tests | No market data | Plan-specific |
| **Practice** | Paper workflow | Varies | Varies | Varies | Not a simulator | Category only |
| **Execution** | Not live | Not compared | Not compared | Product-specific | Not compared | No claim |
| **Workflow** | Ask/cite/screen/test | Product-specific | **Product-specific** | **Product-specific** | Prompt-based | **Directional** |
| **Basis** | Product snapshot | Public pages, 19 Oct | Public pages, 19 Oct | Public pages, 19 Oct | Category view | Not benchmark |

**Anvest brings filing-linked answers, editable screens, backtests with Indian trading charges, paper portfolios and wealth planning into one research workflow.**

*Directional category map based on public pages reviewed 19 Oct 2026; not a hands-on feature benchmark.*

TEAM

# Founder-built product; first hires are in the round plan

## Harsh Bhardwaj

**Founder · full-time on Anvest from the close of this round**

- B.Tech, Electronics and Communication, IIT Guwahati (2015–19)
- Senior Engineering Lead building production multi-agent AI systems
- Seven years building high-throughput backend and distributed systems at New Relic, Shiprocket, Weave and Jaguar Land Rover
- Built Anvest's filing repair pipeline, verification workflows and live product in 12 months without outside capital.

### FIRST HIRES FUNDED BY THIS ROUND

1. **B2B Growth & Partnerships Lead**
   Leads Anvest Desk sales to advisory firms and broker API deals
2. **Senior Data Engineer**
   Owns nightly exchange ingestion, OCR quality, and real-time feeds
3. **Full-Stack & Quantitative Engineer**
   Builds team workspaces, filing alerts, and broker execution links
4. **Second B2B Sales Rep (Month 9 on $500K)**
   Scales direct outbound to 4 new advisory teams per month

*The round plan funds engineering, compliance work and sales hires; no external compliance-adviser bench is represented.*

*Production edge already built: automated fixes for mislabeled NSE filing periods, Q4-buried annual figures, and scanned bank PDFs.*

THE ASK

# Raising the modeled $500K target for professional adoption and partner integrations

$3.5M post-money valuation cap · Convertible Debentures / Preference Shares (CCD/CCPS), subject to counsel · First close $400K, room to $700K

**$185K** — 37%

### Engineering & B2B Sales Team

B2B growth lead, data engineer, full-stack/quant engineer, plus 2nd B2B sales rep in Month 9

**$65K** — 13%

### Compliance, exchange data and cloud

Counsel, registration and any required exchange data; permissions and approvals remain subject to review.

**$100K** — 20%

### Go-to-Market & Operations

Advisory pilot onboarding, search rollout, acquisition tests, and founder salary

**$150K** — 30%

### Cash Reserve & Runway Buffer

Model low point: ₹51 L in M41; modeled cash break-even M42, subject to assumptions.

## MONTH-15 MODEL TARGETS ON THE $500K CASE

**₹87 L**

modeled ARR run-rate (~$92K; ₹7.3L net MRR)

**77 teams**

modeled Desk teams (~243 seats); not current customers

**2 partners**

model target; no signed broker or wealth-app partner

**SEBI RA**

registration target; approval is not assured

**Evaluation**

50-prompt suite proposed; not yet run

**M42**

modeled cash break-even under plan assumptions

*$400K case: ₹68 L M15 ARR; cash-out M31 · $700K case: ₹1.06 Cr M15 ARR; M40 break-even*

**M18 model target: ₹1.12 Cr ARR; Series A timing and financing are not committed.**

# Every Indian investor deserves an analyst, a quant and a planner.

## Anvest puts all three behind one question.

Institutional depth. Retail reach. One verified filings database.

LIVE TODAY

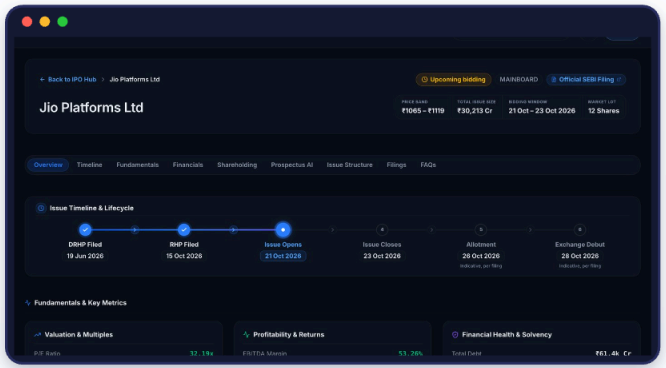

# Filing research, analysis and planning tools in one product

The product connects filing research, screening, costed backtesting, paper trading and planning. Search-led acquisition and paid conversion are hypotheses to measure.

## Stock intelligence

Anvest Score, AI profile, financials and filings; team workspaces planned; team workspaces planned; team d; team d; team d; team planned

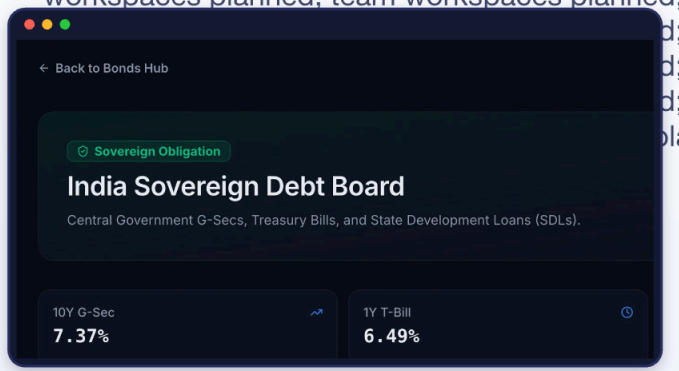

## IPO hub

Jio Platforms: price band, size & dates from its IPO prospectus

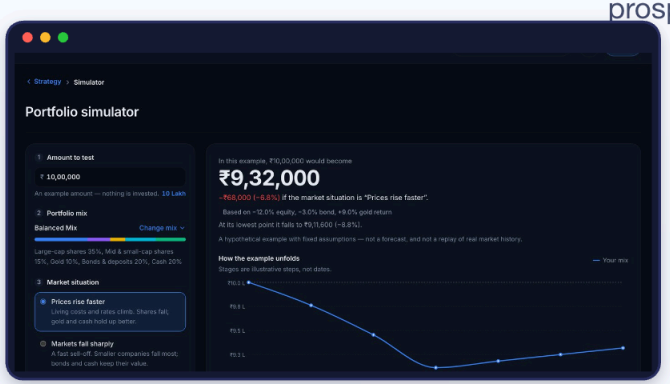

## Mutual fund X-ray

991 schemes compared on returns, cost, risk and overlap

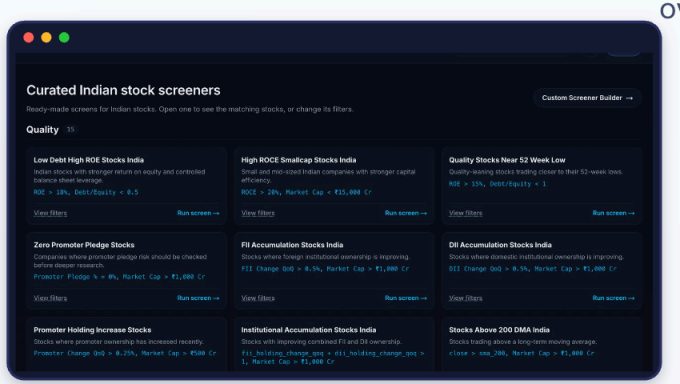

## Bonds and fixed income

Government bonds (G-Secs), T-bill yields & 10-year benchmark

## Market stress simulator

How a portfolio behaves in a sell-off or an inflation shock

## Curated screens

Insider buying, institutional accumulation & quality filters

GO-TO-MARKET

# Win advisory firms via direct sales, then scale through broker APIs

### 1. Direct Outbound to Advisory Boutiques (Anvest Desk)

Founder-led outreach is the initial route to the professional segment. The model sizes 3,900 RA/PMS/IA firms plus 3,350 top distributors; the sales list and conversion remain to be validated.

### 2. Organic Search via 7,000+ Public Stock & Fund Pages

Public stock and fund pages, IPO hubs and calculators are a search-distribution hypothesis. No dated visitor, conversion or device analytics are included.

### 3. B2B2C Distribution via Broker & Wealth-App APIs

Broker and wealth APIs are a partner-distribution hypothesis; access, integration scope, pricing and adoption require partner validation.

### 4. Shareable Research Links & Compliant Creator Referrals

Referral and shareable-research channels remain GTM tests; no creator agreements or referral outcomes are claimed.

**PROPOSED VALIDATION MILESTONES · NOT FORECASTS**

**200**
target firms for outreach

**40**
target demos

**10**
target paid pilots; none established

Model milestones: M3 first Desk revenue; M9 second seller; M10 first partner; M15 77 teams / ₹87 L ARR; M18 99 teams / ₹1.12 Cr ARR. These are model targets; the current company is pre-revenue.

WHERE THIS GOES

# Research, testing and execution have different approval gates

**54%**

of NSE cash-market trading volume is already algorithmic

**67%**

of NSE equity-derivatives volume is algorithmic (73% in stock futures)

**1 Apr 2026**

Retail-algo rules apply to brokers from this date; specific requirements depend on activity and provider role.

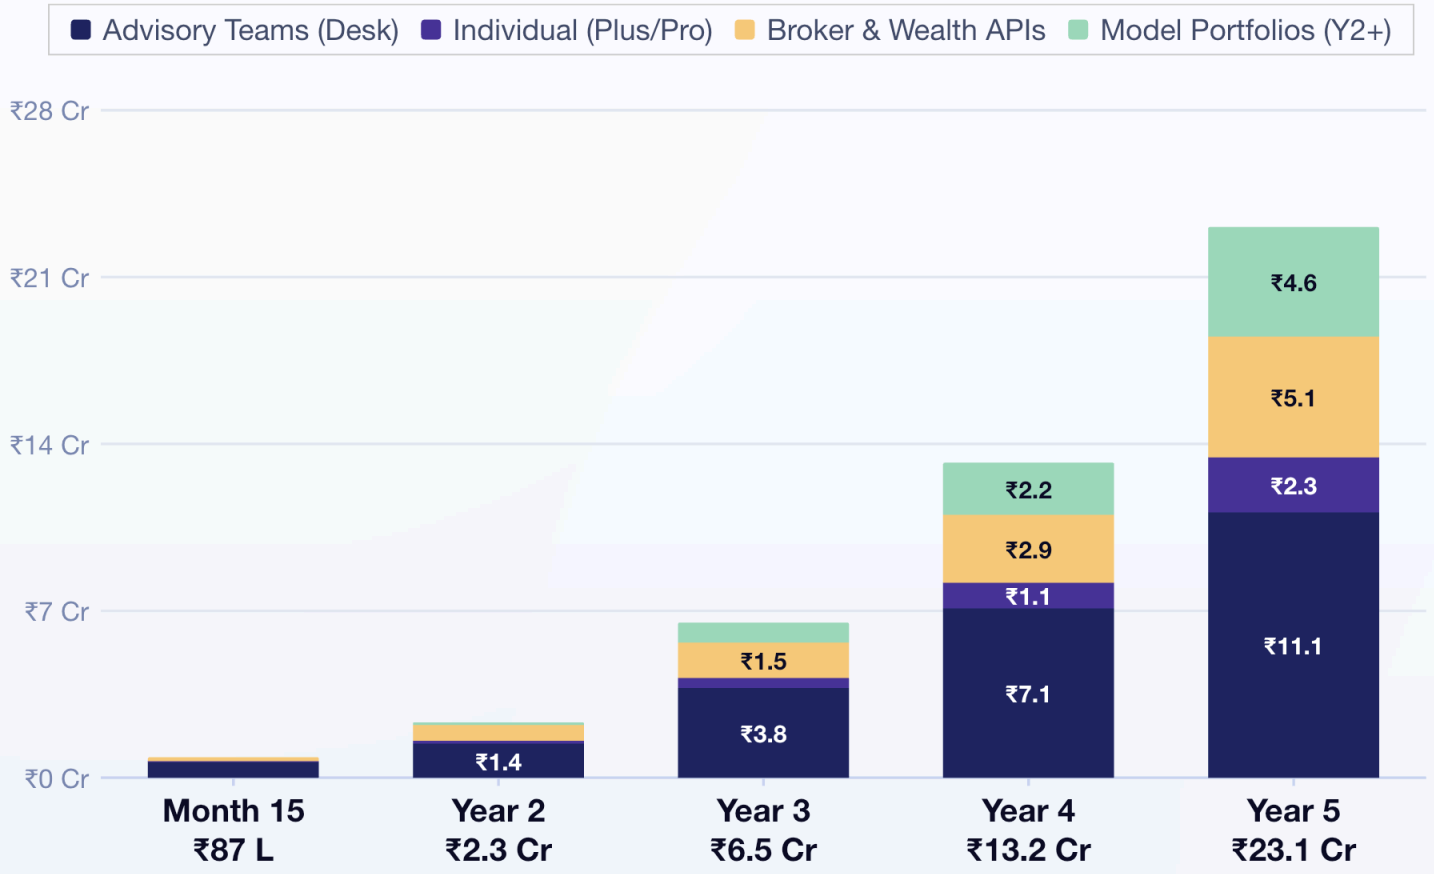

| | | |
|---|---|---|
| **1. Idea** | Ask an investing question or thesis in plain English | LIVE |
| **2. Rules** | Build transparent rules on fundamentals & technicals (P/E, ROE, RSI, SMA) | LIVE |
| **3. Evidence** | Backtest on history with Indian taxes/fees and periodic rebalancing | LIVE |
| **4. Practice** | Forward-test with virtual cash and a decision journal | LIVE |
| **5. Deploy** | Execute periodically rebalanced stock baskets via partner brokers (Post-SEBI License) | NEXT |

**Anvest currently offers research, backtesting and paper trading. Live strategy deployment is a future scenario requiring legal review, partner controls and applicable registration/empanelment; no approval is represented here.**

*NSE Market Pulse, Dec 2025 (turnover share, FY26 to Nov) · SEBI retail algo circulars, 4 Feb 2025 and 30 Sep 2025*

FINANCIAL PLAN

# Model target: M42 break-even on $500K; conditional Series A path to ₹23.11 Cr ARR

## SEED ROUND · MONTH-15 OUTCOMES

| | $400K | $500K | $700K |
|---|---|---|---|
| ARR run-rate | **₹68 L** | **₹87 L** | **₹1.06 Cr** |
| Desk teams | **55** | **77** | **88** |
| Broker APIs | **2** | **2** | **3** |
| Net burn / mo | **₹13.9 L** | **₹15.4 L** | **₹15.6 L** |
| Cash breakeven | **M48*** | **M42** | **M40** |

** $400 case runs out of cash in M31; further capital is needed before modeled M48 break-even. $500K and $700K cases reach modeled break-even without new funding, under plan assumptions.*

## UNIT ECONOMICS & CONDITIONAL SERIES A SCENARIO

- Model: ₹2,245 net/seat/mo; ₹0.73L team CAC; 10.8-month revenue recovery / 23.3-month gross-profit payback. Gross margin: 46% at M15, 83% at Y5. Year-5 ARR: ₹13.4 Cr core + ₹9.7 Cr conditional = ₹23.11 Cr; assumes 14 sellers, 10 partners and required approvals.

*Month-15 net MRR on $500K: ₹5.5L Desk + ₹1.4L APIs + ₹0.4L individuals = ₹7.3L/mo (₹87 L ARR), after modeled GST. Planning FX ₹95/$; values are operating-model outputs.*

OPTIONAL REFERENCE APPENDIX

# Version 1 Nov 2026 · Five-year operating-model scenario and Month-15 assumptions

| Timeline | Sellers (incl. founder) | Monthly Active Users | Individual Subs (Plus/Pro) | Advisory Seats (Desk) | Broker APIs (Active Users) | Model Portfolio Subs | Annualized ARR |
|---|---|---|---|---|---|---|---|
| **Month 15** | 2 | 10,192 | 186 | 243 (77 teams) | 2 (9,593) | — (post-license) | **₹87 L** |
| **Year 2** | 5 | 24,015 | 496 | 532 | 4 (37,466) | 362 | **₹2.32 Cr** |
| **Year 3** | 9 | 84,016 | 1746 | 1,395 | 6 (94,213) | 2,810 | **₹6.51 Cr** |
| **Year 4** | 12 | 1,69,058 | 4519 | 2,634 | 8 (1,97,638) | 7,296 | **₹13.22 Cr** |
| **Year 5** | 14 | 3,40,177 | 9635 | 4,132 | 10 (3,83,373) | 15,349 | **₹23.11 Cr** |

### Month-15 Net MRR ($500K Plan)

₹5.5L Desk + ₹1.4L Broker APIs + ₹0.4L Individual Plans = ₹7.3L net MRR after modeled GST. $400K: ₹5.7L; $700K: ₹8.8L.

### Seed Unit Economics & Payback

Model assumption: 4 new teams/rep/month after ramp, 3 seats/team, 2% churn. Desk team CAC ₹0.73L; 10.8-month revenue recovery and 23.3-month gross-profit payback.

### Series A Expansion (Month 18+)

Year-5 case: 4,132 seats = 19% of the initial 21,750-seat SAM. Desk expands into CA/wealth practices; assumes 14 sellers, 10 partners and model portfolios at ₹250/mo from M22, subject to funding, contracts and applicable approvals.
